

autosoap

mvp automatic soap dispenser

The MVP Autosoap Dispenser combines a next generation touch-free design with disposable and recyclable high quality cartridges and pumps, making it one of the most hygienic method of dispensing soap.

The MVP Autosoap dispenser and soap cartridges have been developed to combine the best features of effective commercial soap dispensing.

The dispenser is robust & reliable making it simple to operate and service.

Sanitex™ Soap refills are available in high quality, pleasantly fragranced, luxurious liquid or foam soap formats. All soaps are dermatologically tested with a pH of 5.5, making them suitable for frequent use and sensitive skin.

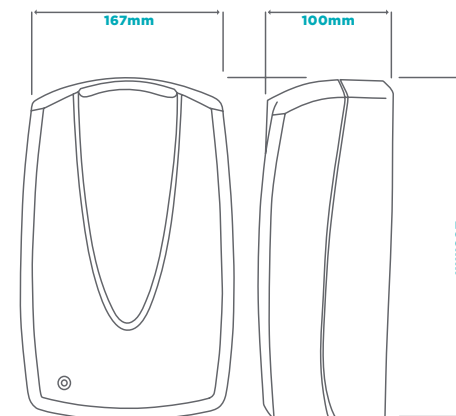

Each cartridge is fully recyclable and comes with a brand new pump, ensuring consistent product delivery and lower maintenance requirements. The closed cartridge system also eliminates contamination.

The 'push to dispense' Sanitex™ system can accept a choice of innovative liquid, spray or foam pumps which provide flexibility for a choice of users' preferred soap option, without the necessity to change the entire dispenser. This feature allows costs to be fixed, and reduces stock holding.

Only one dose required per hand wash.

Soap options:

Antibac Foam Soap, Luxury foam soap, Hand, hair & body wash, Hand sanitiser gel
